Projects & Academic experiences

Developing a web platform as a commissioned project with features for user registration, displaying resumes, publications, and educational materials, and providing communication channels. Role: Full-stack Developer using Next.js and NestJS. The project is being developed collaboratively and will be launched soon.

2025

Madeliran — Collaborated remotely on the development of a health-oriented social networking platform as a developer. This experience involved coordination with cross-functional teams, use of project management tools such as Trello, and participation in online meetings to advance project goals. The project did not reach final completion due to issues on the client side.

2024

co-website, It is an initial prototype that inspired me and motivated me to implement it.

2023

About Me

Front-end developer with experience in designing and implementing modern, responsive user interfaces. I have a strong background in collaborating on team-based projects with a focus on improving user experience and code quality. I am committed to continuous learning and enhancing my technical skills. Currently, I am seeking a new opportunity to grow professionally and contribute effectively to software development teams.
